

BROOKE NODDING

Executive Director Bluenose Coastal Action, Canada

JENNIE LARSSON

Research Associate & PhD Candidate, World Maritime University, Sweden

LARRY HILDEBRAND

Prof, Head, Ocean Sustainability, Governance & Management Canada

Sandra persson

Coordinator/Project Leader Baltic Sea Coastal Action Program, Sweden

Vision without action is merely a dream.

Action without vision just passes the time.

Vision with action can change the world.

Joel A. Barker

How it all started in Sweden...

OLA JOHANSSON

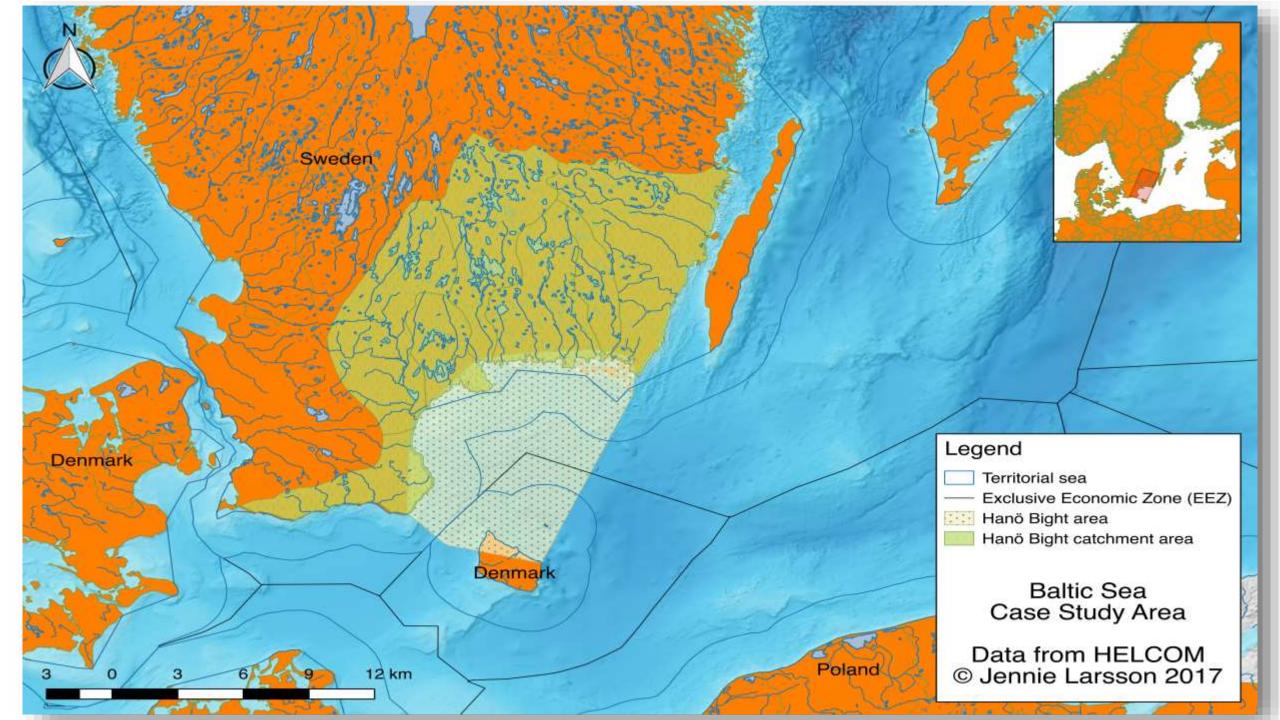

Local Fisherman & Polymath

FISH WITH WOUNDS

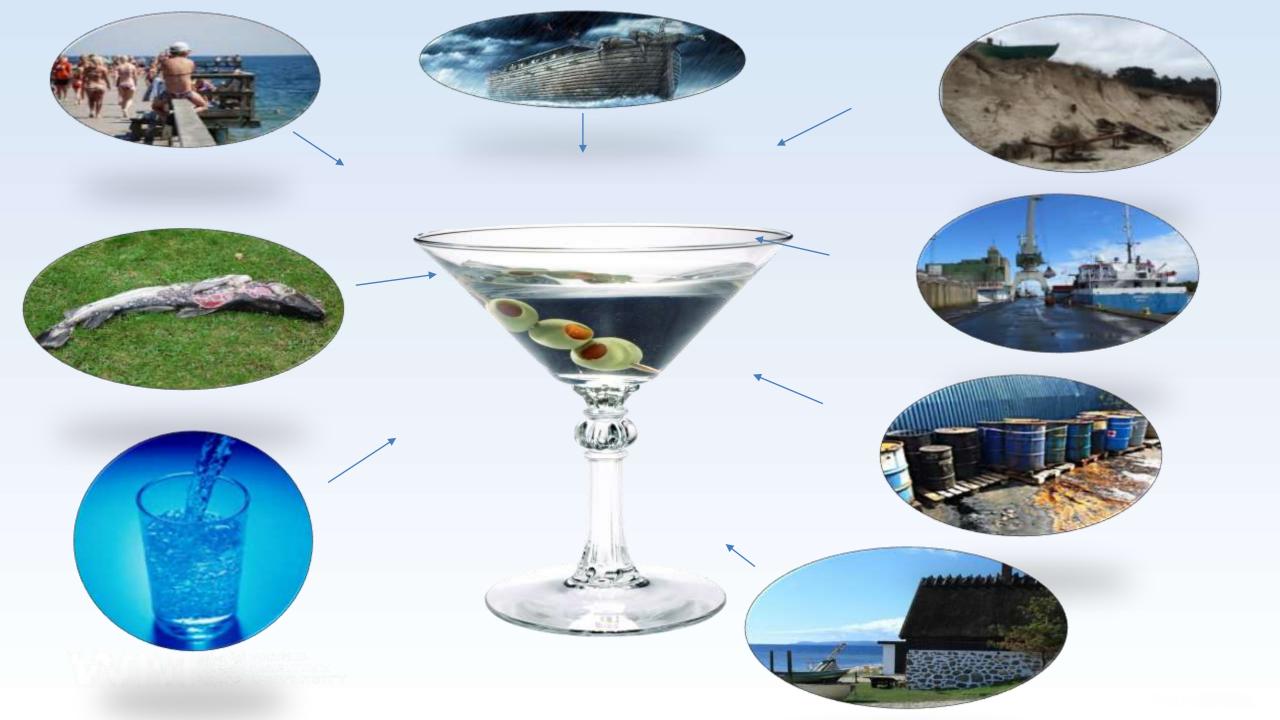

More and more frequent since 2010

ENGAGED LOCALS

Started to take samples themselves

Key Priorities

Pollution in Water

- The Baltic Sea (old sins and on-going)
- Upstream & Land (old sins and on-going)

Beach Erosion/Storm prepardeness

- Coordinated measures
- Coast-effective measures

Drinking Water

- Ensure the quality
- Ensure the quantity

Business opportunities

- Be prepared for transformation
- New solutions to improve environmental degradation

The Story of the Stakeholders

What shall we do?

The Canadian ACAP Model

- Common denominator
 - Larry Hildebrand
- Introduction to Coastal Action as a resource
- Trip to Sweden (Skane Region)
- Funding secured

The Atlantic Coastal Action Program

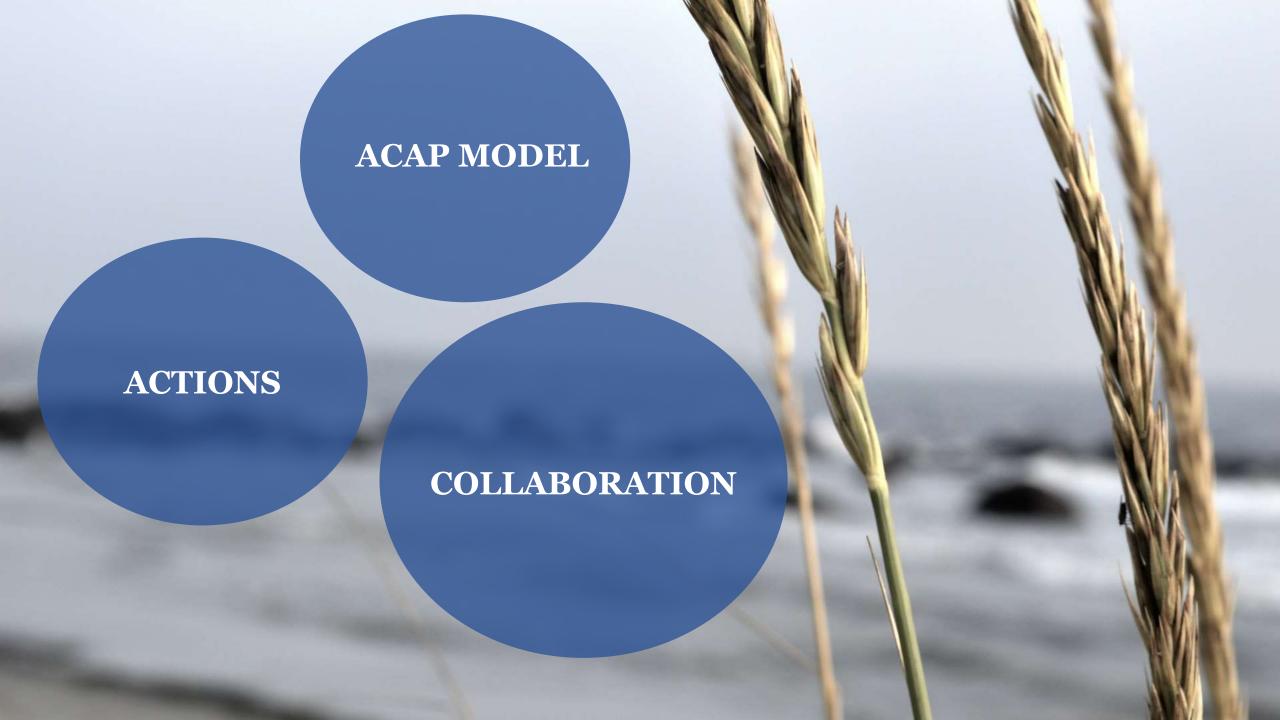

Key Components of ACAP

- 16 independent, ecosystem-based local orgs
- Comprehensive environmental management plans for each watershed/estuary community
- Personal relationship through ACAP 'Windows'
- Partnerships built in the community
- Capacity Building for management and action (short term and long term)
- Knowledge Generation of local ecosystem
- Science partnerships with scientific community
- Action on priority issues in the local area
- Economic System for Financial leverage on investment

Bluenose Coastal Action Foundation

- Inception December 1993
- Vision "A healthy environment for future generations."
- Mission "To restore and protect the environment through research, education, and action."
- Water quality monitoring, fisheries research, species at risk, environmental education, microplastics and marine debris, climate change, wetland remediation, habitat restoration...

Discussion & Questions
