Participatory Land Use Planning based on Inuit Qaujimajatuqangit (IQ)

Michael Ferguson, Jason Mikki & James Qillaq Qikiqtaaluk Wildlife Board, Nunavut, Canada

Outline

- Description of Study Region
- Nunavut Final Agreement & Land Use Planning Issues
- QWB's Land Use Planning Project & Initial Results
- Future Challenges for Local Communities

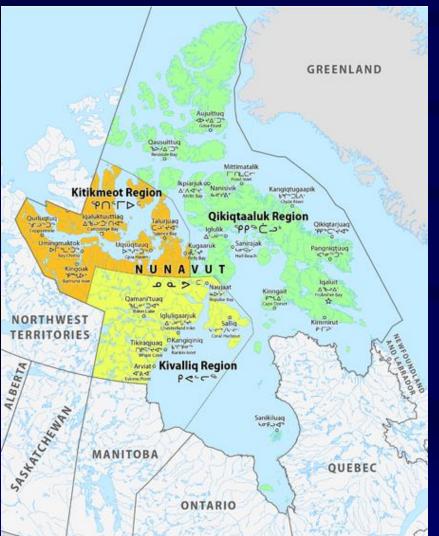

Pond Inlet Today!

Qikiqtaaluk, Nunavut Canada

Canada: 10 million sq km
Nunavut: 2 million sq km
Qikiqtaaluk: 1 million sq km

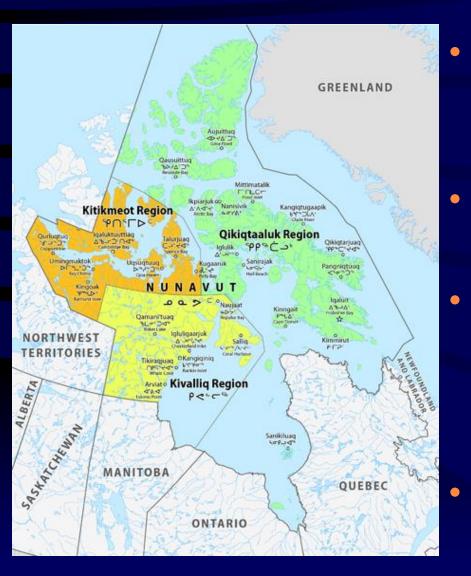

Human Population (% Inuit)
Nunavut: 37,000 (84%)
Qikiqtaaluk: 20,000 (79%)

25

Communities

- Nunavut:
- Qikiqtaaluk: 13

Nunavut Final Agreement

- Inuit & Government of Canada signed in 1993 & created Nunavut in 1999
- Inuit retained ownership of 25% of surface lands
- Defined co-management rights across Nunavut through Inuit - Government institutions
- Ministers of Government retain ultimate authority

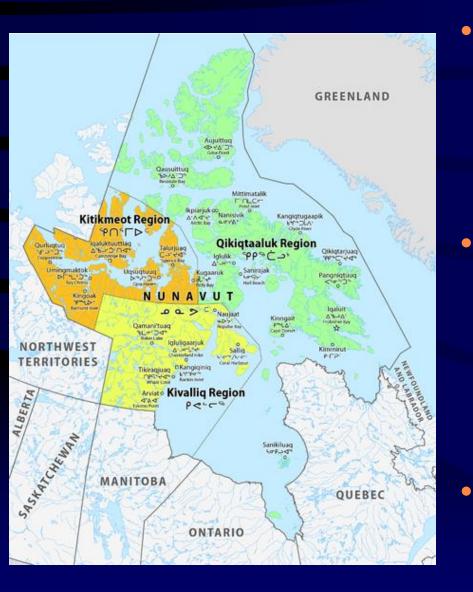

Nunavut Final Agreement, Article 5

Regional Wildlife Organizations (RWOs) All issues about harvesting between HTOs (e.g., QWB) Photos from NWMB.com

Nunavut Final Agreement, Article 11

Nunavut Planning Commission (NPC): Inuit & Government equal membership

Protect & promote
existing & future wellbeing of residents,
accounting for interests of
all Canadians

Enable active & informed participation by Inuit and other residents

Challenges for a Nunavut Land Use Plan

Nunavut larger than Mexico
Only 20 countries are larger than Nunavut.
Still used and valued in traditional ways by Inuit
Active & future mining,

oil, gas, tourism, etc.

Opening of the NW Passage to most sensitive ecosystems

Brief Timeline: 2016 Draft Plan

Nunavut Land Use Plan

- Planning Policies & Objectives approved in 2007
- Earlier draft plans
 produced in 2012 & 2014
- At least 2 consultations held in each community
- Final regional hearings planned for 2017, but only the Qikiqtaaluk Hearing occurred

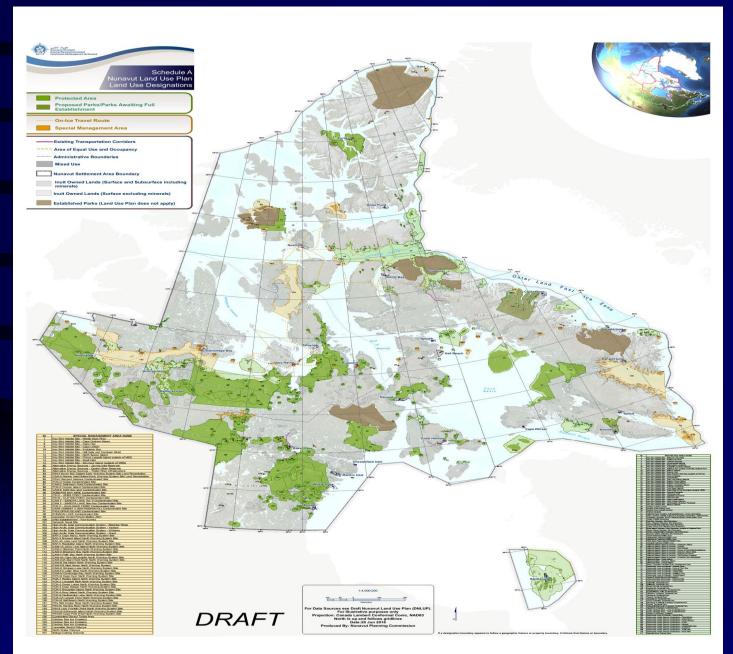

General Issues with 2016 Draft Plan

Nunavut Land Use Plan

- Inuit Qaujimajatuqangit (IQ) is oral knowledge system used within communities.
- Despite consultations & NPC objectives, little IQ incorporated.
 - NPC left communities without training & hiring local Inuit to coordinate input & make trade-offs.
 - IQ is detailed, specific, predictive & accurate.

Land Designations in 2016 Draft Plan

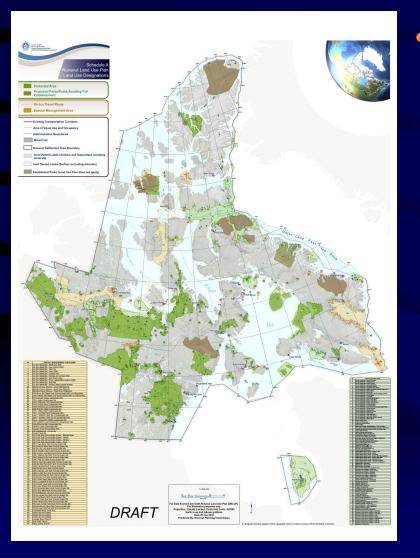

Regional Differences in 2016 Draft Plan

Alter and a set of the set o			
	DRAFT		

Prohibited activity	Kitikmeot % of land	Kivalliq % of land	Qikiqtaaluk % of land	
Mining	31%	26%	8%	
Oil & gas	31%	26%	8%	
Linear develop't	31%	25%	7%	
Tourism (permanent)	4%	7%	0.2%	
Marine shipping	20%	0.2%	3%

Qikiqtaaluk Concerns from 2017 Hearing

- Important areas received little or no protection in Qikiqtaaluk:
 - Caribou calving & postcalving areas, migration routes, & wintering areas
 - Polar bear denning & emergence areas
 - Narwhal & other marine
 mammal habitats
 - Fishing lakes & watersheds
 - Multiple Inuit land-use areas
 for Inuit

Qikiqtaaluk Concerns from 2017 Hearing

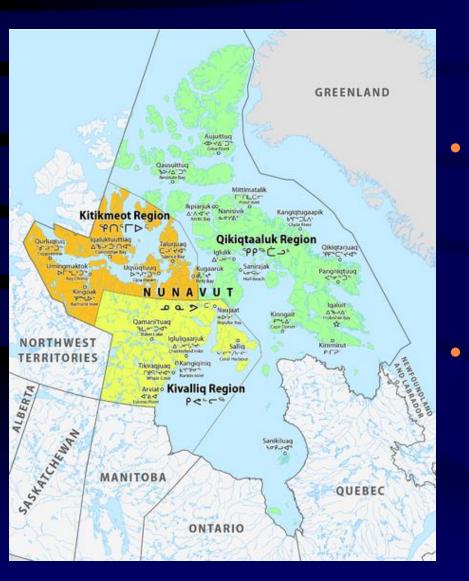

Communities asked why areas they had identified were not included.

At Hearing, 2 communities approached QWB to help with written submissions.

NPC refused more consultation or funding.

Later, QWB confirmed that 12 of 13 HTOs needed help with final submissions.

QWB's Project to Assist HTOs

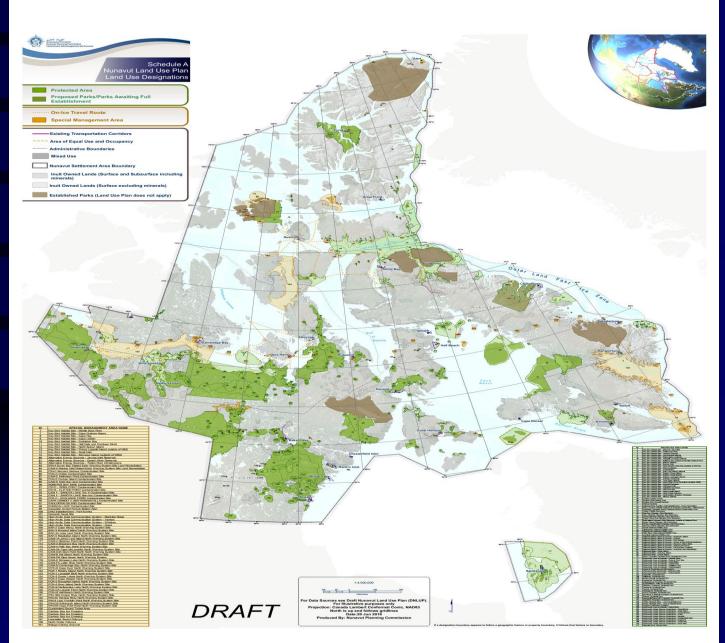

During July 2017 – May 2018, QWB held Land Use Planning Workshops with all 13 HTOs.

All draft submissions planned for September 2018

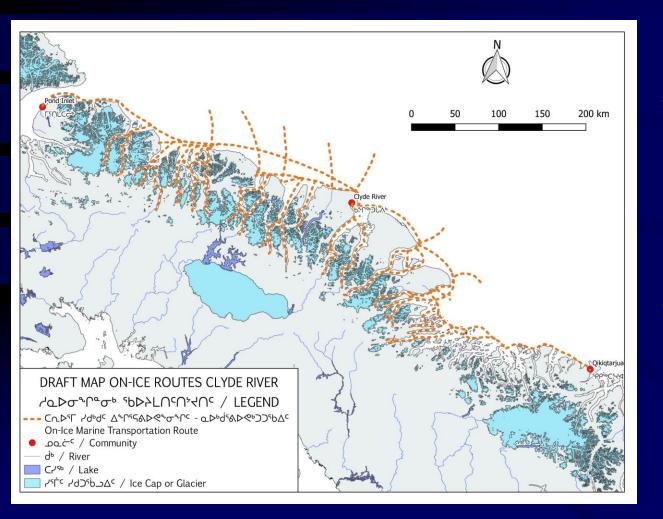

QWB's Project: Methodology

- Workshops followed a semi-directed, focus group design, chaired by the local HTO Chairperson.
- Local focus groups composed of elected HTO Directors, plus 1-3 local experts selected by the HTO Board.
- General Workshop Organization:
 - Orientation: 2016 Draft Plan, designations & types of restrictions currently in the plan.
 - 2. Group directed mapping & listing of values & restrictions.
 - 3. Any missed 2016 designations, overlapping areas & issues.

Land Designations in 2016 Draft Plan

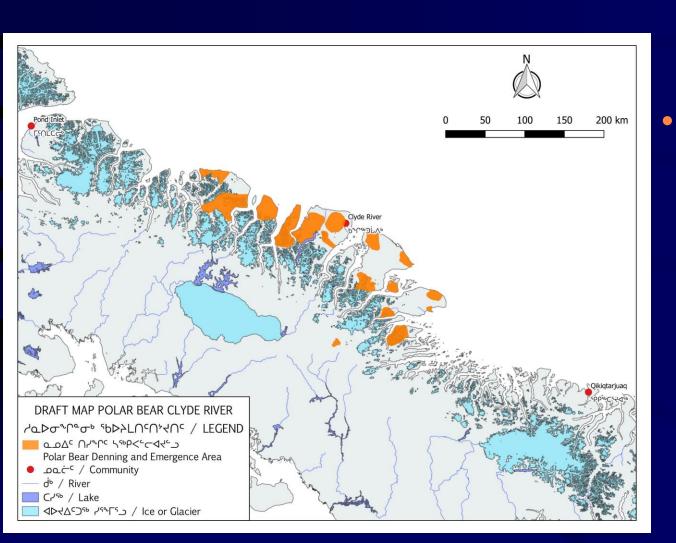

Special Management Area: On-lce Transportation Routes

Closed to all ships from freeze-up to break-up.

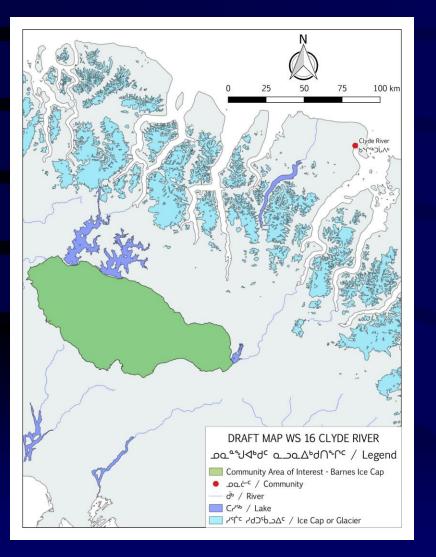

All floe edges closed to ships.

Special Management Area: Polar Bear Denning & Emergence Areas

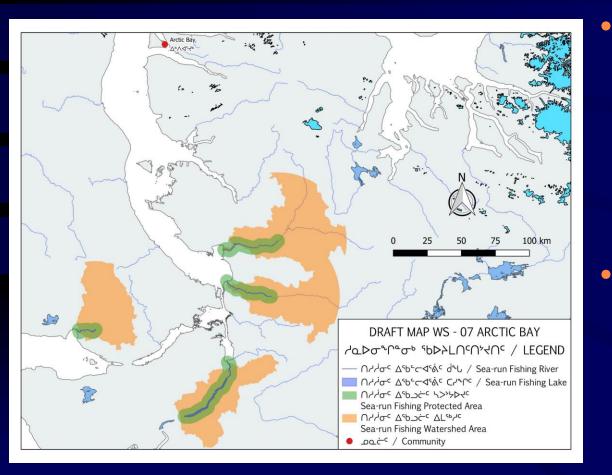

Closed to all development activities from November to May.

Protected Area: Barnes Ice Cap

Prohibited uses: Ice & Water Extraction Oil and Gas Mining Quarries Hydro-electric Linear Infrastructure

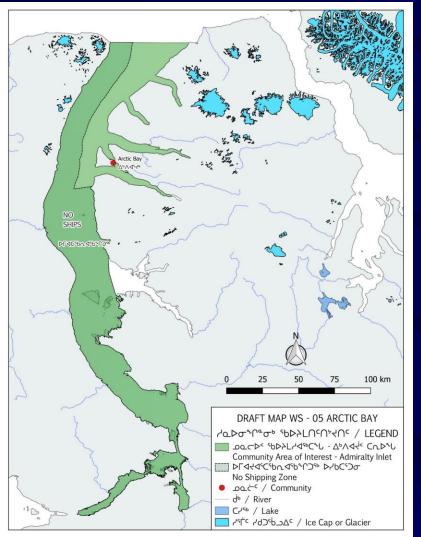

Protected & Special Management Areas: Sea-run Fishing Lakes & Rivers

Prohibited uses within 5 km of fishing lakes & downstream rivers.

Conditional uses in upstream watersheds within 30 km of fishing lakes.

Protected Area: Admiralty Inlet

- Prohibited uses:
 - Oil & Gas
- Seismic testing
 - Disposal at sea
 - Sonar
 - Conditions:
 - No shipping zone
 - Tourism requires HTO approval

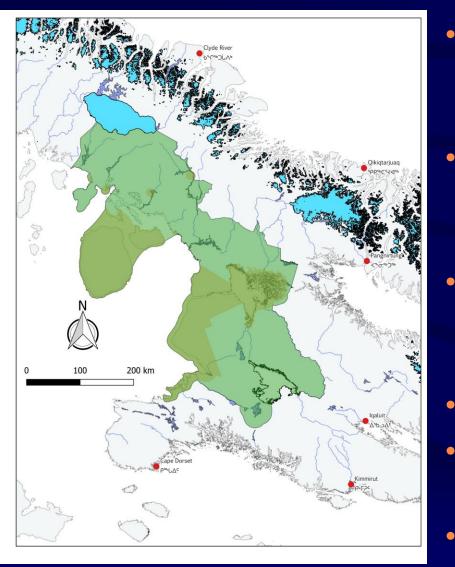

Amendments to Migratory Bird Setbacks

Bird Group All Seabirds, Coastal Waterfowl and Sea ducks

Marine Setbacks

- Increase setback for ships from 500 m to 1.5 km.
- Increase setback from 100 m to 500 m from birds in water without speed restriction for zodiacs, kayaks, boats, etc.
- Add 300 m setback from birds in water with a maximum speed of 3.5 km/hr (1.9 knots) for zodiacs, kayaks, boats, etc.

Protected Area: West Central Baffin Island

- Low-arctic climate stable for 4,750 years surrounded by unstable high arctic
- Meeting area with continuous 3,000 years of use by Inuit & ancestors
- Migratory, calving, postcalving & wintering areas of migratory caribou ecotype
- Landlocked ringed seals
- World's largest snow goose colony
- Denning area of Baffin wolf

QWB's Project: Follow-up Steps

- Locally mapped areas digitized using Q-GIS.
- Based largely on IQ, draft submissions written for each type of HTO-designated area.
- Draft maps & submissions for each community sent to each HTO for review, revision & approval.
- Local HTOs may review these with their community.
- Entire package should be reviewed and approved at the AGM of the QWB in late 2018, and then submitted to NPC.

Future of the Nunavut Land Use Plan

- NPC recently announced that the next draft will be prepared for 2022.
- Federal government has once again denied additional funding requested by NPC.
- Parks Canada, Fisheries & Oceans Canada & Government of Nunavut proceeding with other types of protected area designation.
- Governments of Nunavut & Canada have stated that the 2016 Plan was too detailed & specific, preferring few if any development prohibitions.
